

How to Import the Project in Eclipse?

1. Open Eclipse > Import > Android > "Existing Android Code into Workspace" > Next
2. Root Directory > Click Browse button & browse the project folder > Select 'EclipseProject'
3. Select All projects in folder EclipseProjects :
 - >  android-support-v7-appcompat
 - >  android-support-v7-palette
 - >  cardview
 - >  design
 - >  EcommerceAndroidApp
 - >  fablibrary
 - >  google-play-services_lib
 - >  recyclerview
4. Make sure Android you have set the target for all the project are set on Android 6.0 (API 23), you can check each of project by Right Click > Properties > Android > Project Build Target > Android 6.0 (is checked).
5. Then go to 'Project' Menu > Clean.. > Clean All Projects > OK
6. Wait for few minutes until all errors are gone. Ignore any warning appears in 'Problems' tab.
7. If you still find red error, try to restart your Eclipse (File > Restart)
 - if red Error on 'design' > Right Click > Properties > make sure "android-support-v7-appcompat" has been added as library in 'design' project, the indicator in green ceck color.
 - if red Error on 'YourVideosChannel' > Right Click > Properties > make sure all required library project has been added as library in 'YourVideosChannel' project, the indicator in green ceck color.

Import Projects

Select a directory to search for existing Android projects

Root Directory: D:\Envato\E-CommerceAndroidApp\EclipseProjects

Browse...
