

# How to change Splash Image and other Images Assets Component?

1. Open Android Studio > **app** > **res** > **drawable**, and replace with your image or icon, all image are placed on **drawable-hdpi** folder.
2. Other alternative, you also can change every image in app like you want, open Explore > go to directory your project, select EcommerceAndroidApp\app\src\main\res\drawable-hdpi
3. Replace every image which you need to custom the application and highly recommended you using same resolution for each image.
